# 2015 Track Attack Series

The Track Attack Series is the second level of racing available above club racing. This series allows club riders to race at different clubs and gain points towards year-end ranking and prizes. Track Attack points will be awarded at each event, all points accumulated at these events count toward the year-end totals.

Experts and Cruisers will compete for ranking at the provincial level while Novice and Intermediate riders will be ranked within the current 8 zones. With a limited amount of races used to accumulate ranking points, the competition will heat up and the double and triple point events will be exciting cross club races. For this series the male cruiser class will be formed by placing all Men into one class. Qualifiers will transfer to A and B mains. Woman cruiser classes will follow moto building rules as outlined in the BC Cycling BMX Guidelines.

The Track Attack program will use the club points table to calculate the points, multiplied by the level of event (single, double or triple). The point level used to calculate points for an event will be based on the highest proficiency level of the riders in the class at that race. Any rider that has been moved into a higher proficiency level for a race (example Novice rider racing in an Intermediate class) will be awarded the higher level points. Riders also receive add-on points for the number riders in the moto.

Please note: **Weather cancelled races will not be rescheduled.**

## Track Attack Points Table
